

LIQUIDS TRANSPORTATION SYSTEM

Liquids Transportation System (LTS) is a secure online platform that provides Producers, Facility Operators and Shippers the capability to communicate and manage forecast and actual delivery volumes for Natural Gas Liquids through the submission / approval of industry standard forms

What makes LTS so great?

Automates Manual Processes : Forecast shipping volumes, capture production information, and reconcile delivered quantities to complete and submit delivery volumes online each month

Leverages Standardized Data: Gain access to the most up-to-date reference data straight from the source

Exceptional Support: Need help? Get it fast with our support team as we offer a variety of support such as: Live Chat, Lunch and Learns and the Petrotranz University

What's in it for you?

USERS

- Efficiently create, submit and revise forms such as: Consolidated Liquids Form As, Consolidated Shipper Splits and Raw Gas Form As
- Consolidated Liquids Form Bs are created and submitted automatically whenever a Consolidated Liquids Form A is revised and submitted
- Streamline the processing of your incoming forms by setting up and managing eligible shipper lists and product types for each of your facilities

MANAGEMENT

- LTS keeps a historical record of every event that happens within the form submission/approval process allowing for effective audit compliance
- Access to standardized industry forms that seamlessly tie together the entire three-month reporting requirements
- Full integration and interfacing functionality between Marketing, Production Accounting, and Facility Management systems

Integrate

Easily leverage system to system automated communication using industry standard data definitions and data schemas available through Petrotranz' Technology Adoption Program (TAP)

Modern Support

Fully supported on Google Chrome, Edge and Internet Explorer 11
